

# Software Carpentry

January 17-18, 2019

## Day 1:

Command Line  
Bash Shell  
Version control  
with git &  
GitHub

## Day 2:

Programming,  
visualization, and analysis  
with R/RStudio

Software Carpentry aims to help researchers get their work done in less time and with less pain. This hands-on workshop will cover basic research computing concepts and tools, including program design, version control, data management, and task automation.

Who: The course is aimed at faculty, staff, and students. You don't need to have any previous knowledge of the tools that will be presented at the workshop.

Where: Goldsmith Lounge, Virtue Field House, Middlebury, VT 05753

When: January 17-18, 2019, 9-5pm
